Dharmachakra Nagi Jibed

Life and death

death is the most profound and mysterious aspect of life for everyone. The feeling because no matter what matters they have heard, they still cannot figure out what it is, nothing we were not able to figure out what death is.

The spiritual process is not about death – you are seeking something which is deeper than death. Death is the result of the spiritual process, it is not the process itself.

If your memory was such that, every day when you wake up in the morning, you do not remember that there was a previous day, you do not remember that you were in sleep, you do not remember that you were awake, then every day, it would feel like you are in a wonderful environment and it would be most mysterious. The few hours of sleep would be a time of profound and mysterious aspect of your life simply because you do not know that you are awake, you are not sleepingore, or you are sleeping. The mystery and profundity of death is just the same.

This birth and death are just pottery business – picking a piece of earth, shaping it into human form and of course, making it walk and talk. And this pottery business which turns into pottery, you never see the pottery. To know the play from the backstage is a completely different thing. Once you stage the play, you can stage the whole play, after sometime you are kind of done with it. You may enjoy the mechanics of it, but you are no longer ex.
